

Internal Equity Portfolio Performance

Total Returns in GBP; 26 Aug '14 = 100

Internal Equity Portfolio versus Benchmark (Log)

Based on Total Returns in GBP, 26.8.14 = 0%, differential in log total return

The Internal Equity Strategy is a low turnover, concentrated portfolio of large cap equities, listed on developed market exchanges. Our investment strategy is to identify high quality businesses with sustainable business models that are able to compound shareholder returns over a full business cycle. We seek to buy these businesses with these characteristics at valuations that are attractive on an absolute and relative basis.

The portfolio is constructed to generate a total return that is in line with our Statement of Investment Principles (SIP) while controlling exposure to fundamental business risk.

Richard Savage	Portfolio Manager
Alejandro Rodriguez	Deputy Portfolio Manager

June Performance Commentary

The Portfolio returned c.-1.3% in June, underperforming the MSCI World by c. 105bps. The relative underperformance during the month was due to the portfolio's overweight exposure to consumer staples and IT and its underweight to financials. From a stock selection standpoint, the relative negative returns of the portfolio's consumer discretionary and industrials holdings were partially offset by the relative outperformance of the healthcare stocks.

LSE, Medtronic and Johnson & Johnson were notable contributors to performance. Texas Instruments, Alphabet and ABInbev were the main detractors.

Internal Equity performance calculated based on Bloomberg EoD pricing of equity and FX exposures and cashflows through the custodian JP Morgan. Comparative MegaCap performance and statistics are based on a portfolio of stocks derived from the Bloomberg World global equity index; to be eligible for inclusion in the MegaCap benchmark, stocks must be traded on an approved exchange and have a market capitalisation of greater than \$10bn on the rebalancing date. The MegaCap constituents are rebalanced biannually in line with the underlying Bloomberg World index. This factsheet does not provide advice on legal, taxation or investment matters and should not be relied upon for any purpose without seeking independent advice. * During October 2016, the portfolio was subject to a transition of the entire equity assets of LPP's clients (LCPF & LPFA) to a new common depository. Therefore a precise performance figure for this month is not possible to be obtained but in order to provide indicative performance of how the portfolio would have performed, had the transition not occurred, we have provided a prudent estimate in respect of October 2016. This figure is incorporated in all historical performance data in this factsheet.
