1. Narrative Report

Format of the Statement of Accounts

The primary function of the London Pensions Fund Authority (LPFA) is as an Administering Authority within the Local Government Pension Scheme.

The LPFA's Pension Fund Statement of Accounts for the financial year 2024-25 consists of:

The **Fund Account** which shows the Fund's income and expenditure for the year;

The **Net Assets Statement** which shows the net assets of the Fund at 31 March 2025; and,

The **Notes** and accounting policies to support the Pension Fund accounts.

1. Narrative Report continued

Investment performance

Over the 12 months to 31 March 2025 the Fund delivered a 3.1% investment return. This return was below the Fund's Return Objective of 6.0%, where the Return Objective is a long-term objective calculated as UK inflation (as measured by the Consumer Prices Index (CPI) plus 3.6% p.a. It is worth noting that few assets were able to deliver a return of this magnitude over the year. The Fund also underperformed, to a lesser extent, versus its Policy Portfolio Benchmark, which is a single return measure which combines each asset class benchmark in proportion to the Fund's strategic asset allocation.

The Fund is a long-term investor, and over the longer-term strategic horizons of three and five years, the Fund has delivered positive absolute returns of 4.4% p.a. and 8.5% p.a., respectively. While the five-year return is aligned relative to the Return Objective, the three-year performance has fallen short. Additionally, the Fund underperformed the Policy Portfolio Benchmark across both time periods, reflecting a more mixed picture in relative terms.

Relative performance has been primarily driven by the Fund's allocations to Global Equities and Infrastructure. Within Global Equities, the Fund achieved a positive absolute return but trailed the broader market, which was driven by a narrow cohort of dominant US technology stocks – commonly referred to as the “Magnificent 7.” The Fund's aggregate underweight position in these companies, relative to the benchmark, limited its participation in the rally throughout most of the year. However, the Fund's underweight position in these companies proved beneficial towards the end of the financial year, as the market rally reversed. Infrastructure's relative performance continues to be impacted by elevated UK CPI inflation over the past three years, as the asset class is benchmarked against UK CPI. Although inflation has moderated since peaking in October 2022, its lingering effects are expected to be captured within the trailing performance horizon for the longer-term Return Objective and benchmark figures, and hence it continues to weigh on relative performance.

Return metric	One Year (%)	Three Year (% p.a.)	Five Year (% p.a.)
Total Return	3.1	4.4	8.5
Return Objective*	6	8.8	8.5
Policy Portfolio Benchmark	5.2	6	10.3

* A blend of UK CPI +3.6% p.a. from April 2021, 5.3% (equivalent to UK CPI +2.7% p.a. at March 2019) between March 2019 and April 2021 and RPI +3% prior to March 2019.

Note: Returns over one year are annualised.

1. Narrative Report continued

During the second half of the year the Investment Committee and Board undertook a detailed review of the Fund's Investment Strategy and agreed a revised Strategic Asset Allocation (SAA) which came into effect on 1 April 2025. This updated SAA is detailed in the Fund's Investment Strategy Statement and will be reflected in the next Annual Report. The most notable change to the SAA was the introduction of an allocation to Environmental Opportunities.

The following table presents LPFA's asset allocation at the end of March 2025 versus its SAA. The asset allocation as at the end of the previous financial year is also shown for comparison purposes.

Asset Class	31 March 2025		31 March 2024		Strategic Asset Allocation %	Range %
	Exposure £m	Exposure %	Exposure £m	Exposure %		
Global Equities	4,287	53.3	4,301	53.5	51	41.0 – 61.0
Fixed Income	305	3.8	194	2.4	2.5	0.0 – 10.0
Private Equity	462	5.7	566	7	5	0.0 – 10.0
Infrastructure	918	11.4	923	11.5	14	9.0 – 19.0
Credit	1,156	14.4	957	11.9	15	10.0 – 20.0
Real Estate	734	9.1	735	9.1	11	6.0 – 16.0
Diversifying Strategies	1	0	236	2.9	–	–
Cash	188	2.3	126	1.6	1.5	0.0 – 7.5
Total	8,051	100%	8,038	100%	100%	

* Strategic Asset Allocation shown in this table is the long-term Strategic Asset Allocation, as referenced in the Fund's Investment Strategy Statement 2024. As mentioned above, a revised Strategic Asset Allocation came into effect on 1 April 2025, which is detailed in the Fund's Investment Strategy Statement 2025.

Date the Statement of Accounts were authorised for issue

The statement of accounts was authorised for issue by the Audit and Risk Committee on 23 September 2025. Post balance sheet events have been considered up to the date the accounts were authorised for issue.

Further information

Further information about these accounts is available from the London Pension Fund Authority, 2nd Floor, 169 Union Street, London SE1 0LL. In addition, further information on the LPFA's performance can be seen alongside the accounts in the LPFA Annual Report which can be requested at the address above or will be available on the LPFA website from 1 December 2025.

1. Narrative Report continued

London Pensions Fund Authority (LPFA), is the largest Local Government Pension Scheme (LGPS) in London. The Pension Fund had net assets of £8.08 billion as at 31 March 2025 (31 March 2024: £8.03 billion) and is responsible for the provision of pension benefits for 100,652 (2023-24: 99,585) members. Of these, 22,958 are employees working for not-for-profit, charity, private sector and local government employers, 30,487 are deferred members, 36,919 are pensioners and dependants, and 10,288 are undecided leavers and frozen refunds.

Pension Fund actual result compared to budget

Pension Fund	Actual 2024-25 £'000	Budget 2024-25 £'000	Variance 2024-25 £'000	Variance 2024-25 %
Dealings with members and employers				
Contributions	162,039	154,830	7,209	4.7%
Transfers in from other funds	22,929	10,100	12,829	127.0%
Benefits payable	(332,382)	(320,130)	(12,252)	(3.8%)
Payments on account of leavers	(36,719)	(19,400)	(17,319)	(89.3%)
Net additions/ (withdrawals) from dealings with members	(184,133)	(174,600)	(9,533)	(5.5%)
Management expenses				
Investment management	(84,889)	(109,230)	24,341	22.3%
Administration	(3,078)	(3,080)	2	0.1%
Oversight and governance	(4,402)	(6,120)	1,718	28.1%
Investment services fee LPPI	(214)	(1,000)	786	78.6%
Total management expenses	(92,583)	(119,430)	26,847	22.5%
Returns on Investments				
Net investment income	256,055	148,500	107,555	72.4%
Taxes on income	(915)	–	(915)	0.0%
Profit and loss on disposal and change in market value	67,605	538,120	(470,515)	(87.4%)
Total return on investments	322,745	686,620	(363,875)	(53.0%)
Net inflow to the Fund	46,029	392,590	(346,561)	(88.3%)

1. Narrative Report continued

Overview of the year

The net inflow from the Fund for the year was £46.0 million (2023-24: £372.7 million) compared to a budgeted inflow of £392.6 million (2023-24 £171.4 million). The net inflow is below the budgeted net inflow by £346.5 million (2023-24: above budget by £201.4 million) predominantly due to the lower than expected profit and loss on disposal and change in market value of the investments.

Dealings with members and employers:

The total Fund membership to 31 March 2025 grew by 1,067, being 1.07% (2023-24: 2,789, being 2.9%). Active members decreased by 772, being -3.25% (2023-24: 991, being a 4.4% increase) and pensioners increased by 356 being a 1% increase (2023-24: 354, being a 1% increase).

The decrease in active members did not result in a decline in contribution income mainly due to the increase in pensionable pay.

This year the gross movement in employers participating in the Fund (both joining and leaving) is an increase of one employer.

Transfers in from other funds are above budget by £12.8 million, but £4.1 million below the value for 2023-24. Although, individual transfers in increased, bulk transfers in are negative because the amounts received in 2024-25 for amounts receivable at 31 March 2024 were £2.2 million below what was expected.

Non-investment asset and liabilities

Payments on account of leavers are £17 million above budget, but £60 million less than the value for 2023-24 as last year four employers that were in surplus left the scheme, with one benefiting from significant cessation surplus. The same number of employers left the scheme with surplus assets in 2024-25.

The cash held directly by the LPFA has increased by £24 million to £35 million in accordance with the cash balance range stipulated in the LPFA treasury policy.

Current liabilities have reduced by £57 million to £31 million (2023-24: balance £88 million). This is due to the fact that the significant cessation surpluses payable at the end of 2023-24 were paid during the year.

2. Statement of Responsibilities for the Statement of Accounts

The LPFA's responsibilities

The LPFA is required to:

- Make arrangements for the proper administration of its financial affairs and to ensure that one of its officers has responsibility for the administration of those affairs (the Section 151 Officer)
- Manage its affairs to secure economic, efficient and effective use of resources and safeguard its assets
- Approve the Statement of Accounts

The Section 151 Officer's responsibilities

At the LPFA the Section 151 Officer is responsible for:

- The preparation of the LPFA's Statement of Accounts in accordance with proper accounting practices as set out in the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom
- Keeping proper financial records and accounts and maintaining an effective system of financial control

In preparing this Statement of Accounts, the Section 151 Officer has:

- Selected suitable accounting policies and applied them consistently
- Made judgements that were reasonable and prudent
- Taken reasonable steps for the prevention and/or detection of fraud and/or other irregularities
- Complied with the code

Certificate of approval

I certify that the Statement of Accounts presents a true and fair view of the financial position of the LPFA as detailed in the net asset statement and its results for the year as detailed in fund account for the year ended 31 March 2025.

Christina Thompson, Section 151 Officer
30 September 2025

3. Independent Auditor's Report to the members of the London Pensions Fund Authority

Report on the Audit of the Pension Fund Financial Statements

**Shape the future
with confidence**

INDEPENDENT AUDITOR'S REPORT TO THE BOARD OF LONDON PENSIONS FUND AUTHORITY ON THE PENSION FUND'S FINANCIAL STATEMENTS

Opinion

We have audited the Pension Fund ("the Fund") financial statements for the year ended 31 March 2025 under the Local Audit and Accountability Act 2014 (as amended). The Pension Fund financial statements comprise the Fund Account, the Net Assets Statement and the related notes 1 to 26.

The financial reporting framework that has been applied in their preparation is applicable law and the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2024/25.

In our opinion the Pension Fund financial statements:

- give a true and fair view of the financial transactions of the Fund during the year ended 31 March 2025 and the amount and disposition at that date of its assets and liabilities as at 31 March 2025; and
- have been properly prepared in accordance with the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2024/25.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report below. We are independent of the Authority, as administering authority for the Pension Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard and the Comptroller and Auditor General's AGN01, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Section 151 Officer's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Authority's ability to continue as a going concern for a period to 31 March 2027.

Our responsibilities and the responsibilities of the Section 151 Officer with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Authority's ability to continue as a going concern.

Other information

The other information comprises the information included in the '*Statement of Pension Fund Accounts for the period ended 31 March 2025*', other than the financial statements and our auditor's report thereon. The Section 151 Officer is responsible for the other information contained within the '*Statement of Pension Fund Accounts for the period ended 31 March 2025*'.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

3. Independent Auditor's Report to the members of the London Pensions Fund Authority *continued*

Report on the Audit of the Pension Fund Financial Statements *continued*

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Matters on which we report by exception

We report to you if:

- we issue a report in the public interest under section 24 of the Local Audit and Accountability Act 2014 (as amended);
- we make written recommendations to the audited body under Section 24 of the Local Audit and Accountability Act 2014 (as amended);
- we make an application to the court for a declaration that an item of account is contrary to law under Section 28 of the Local Audit and Accountability Act 2014 (as amended);
- we issue an advisory notice under Section 29 of the Local Audit and Accountability Act 2014 (as amended); or
- we make an application for judicial review under Section 31 of the Local Audit and Accountability Act 2014 (as amended).

We have nothing to report in these respects.

Responsibility of the Section 151 Officer

As explained more fully in the '*Statement of Responsibilities for the Statement of Accounts*' set out on page 6, the Section 151 Officer is responsible for the preparation of the Authority's Statement of Accounts, which includes the Pension Fund financial statements, in accordance with proper practices as set out in the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2024/25, and for being satisfied that they give a true and fair view. The Section 151 Officer is also responsible for such internal control as the Section 151 Officer determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Section 151 Officer is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Administering Authority either intends to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with Section 151 Officer.

3. Independent Auditor's Report to the members of the London Pensions Fund Authority continued

Report on the Audit of the Pension Fund Financial Statements continued

Our approach was as follows:

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Fund and determined that the most significant are the Local Government Pension Scheme Regulations 2013 (as amended), and The Public Service Pensions Act 2013.
- We understood how the Fund is complying with those frameworks by making enquiries of the Management. We corroborated this through our reading of the Board, Investment and Audit and Risk Committee minutes, Pension Fund policies and procedures and other information.
- Based on this understanding, we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved making enquiries of the management for their awareness of any non-compliance of laws or regulations, inspecting correspondence with the Pensions Regulator and review of minutes.
- We assessed the susceptibility of the Fund's financial statements to material misstatement, including how fraud might occur by considering the key risks impacting the financial statements and documenting the controls that the Fund has established to address risks identified, or that otherwise seek to prevent, deter or detect fraud.
- In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override. In addressing the risk of fraud through management override of controls, we tested the appropriateness of journal entries and other adjustments; assessed whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluated the business rationale of any identified significant transactions that were unusual or outside the normal course of business. These procedures were designed to provide reasonable assurance that the financial statements were free from fraud or error.
- To address our fraud risk we tested the consistency of the investment income from the independent sources of the custodian and the fund managers to the financial statements.
- The Fund is required to comply with The Local Government Pensions Scheme regulations, other legislation relevant to the governance and administration of the Local Government Pension Scheme and requirements imposed by the Pension Regulator in relation to the Local Government Pension Scheme. As such, we have considered the experience and expertise of the engagement team including the use of specialists where appropriate, to ensure that the team had an appropriate understanding of the relevant pensions regulations to assess the control environment and consider compliance of the Fund with these regulations as part of our audit procedures.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Use of our report

This report is made solely to the members of London Pensions Fund Authority, as a body, in accordance with Part 5 of the Local Audit and Accountability Act 2014 (as amended) and for no other purpose, as set out in paragraph 85 of the Statement of Responsibilities of Auditors and Audited Bodies published by Public Sector Audit Appointments Limited. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the London Pensions Fund Authority and its members as a body, for our audit work, for this report, or for the opinions we have formed.

Net assets of the Fund available to fund benefits at the end of the reporting period*		8,076,680	8,030,651

* The net assets per the accounts are £27 million more than the assets disclosed in the investment report due to a £30 million uplift to LPPI Credit and LPPI Infrastructure investment values based on the statements as at 31 March 2025 that were issued in June 2025, being after the date of the investment report. In addition, non-investment assets and liabilities are excluded from the investment report.

Christina Thompson, Section 151 Officer
30 September 2025

6. Notes to the Fund Account

1. Description of Fund

a) General

The scheme is governed by the Public Service Pensions Act 2013. The Fund is administered in accordance with the following secondary legislation:

- the Local Government Pension Scheme Regulations 2013 (as amended)
- the Local Government Pension Scheme (Transitional Provisions, Savings and Amendment) Regulations 2014 (as amended)
- the Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016
- the Local Government Pension Scheme (Amendment) Regulations 2018.

It is a contributory defined benefit scheme administered to provide pensions and other benefits to members of the scheme who are working for not-for-profit, charity, private sector and local government employers. Teachers, police officers and firefighters are not included as they come within other national pension schemes. The Fund is overseen by a Board of Non-Executive Members.

b) Membership

Membership of the LGPS is voluntary and employees are free to choose whether to join the scheme, remain in the scheme or make their own personal arrangements outside the scheme.

Organisations participating in the LPFA include the following:

- Scheduled bodies, which are automatically entitled to be members of the Fund
- Admitted bodies, which participate in the Fund under the terms of an admission agreement between the Fund and the employer. Admitted bodies include voluntary, charitable and similar not-for-profit organisations, or private contractors undertaking a local authority function following outsourcing to the private sector.

Details of the participating employer bodies and their individual contribution rates for the year ended 31 March 2025 are set out on pages 42-43.

The Fund membership was as follows:

Fund membership	31 March 2025	31 March 2024
Number of employers	116	115
Number of active members:		
LPFA	38	27
Other employers	22,920	23,703
Total	22,958	23,730
Number of deferred beneficiaries:		
LPFA	106	107
Other employers	30,381	30,031
Total	30,487	30,138
Number of pensioners and dependents:		
LPFA	86	84
Other employers	36,833	36,479
Total	36,919	36,563
Number of undecided leavers and frozen refunds:		
LPFA	19	12
Other employers	10,269	9,142
Total	10,288	9,154
Total number of members in pension scheme	100,652	99,585

6. Notes to the Fund Account continued

c) Funding

Benefits are funded by contributions and investment earnings. Contributions are made by active members of the Fund in accordance with the Local Government Pension Scheme Regulations 2013 and range from 5.5% to 12.5% of pensionable pay for the financial year ended 31 March 2025. Employers' contributions are set based on the triennial actuarial funding valuations. The last such valuation was at 31 March 2022. Currently employer contributions range from 0% to 33.1%.

d) Benefits

Prior to 1 April 2014, pension benefits under the LGPS were based on final pensionable pay and length of pensionable service. From 1 April 2014, the scheme became a career average scheme, whereby members accrue benefits based on their pensionable pay in that year at an accrual rate of 1/49th. Accrued pension is uprated annually in line with the Consumer Prices Index.

A range of other benefits are also provided including early retirement, disability pensions and death benefits, as explained on the LGPS website – see www.lgpsmember.org

2. Basis of preparation

The Statement of Accounts summarises the Fund's transactions for the 2024-25 financial year and its financial position at 31 March 2025. The accounts have been prepared in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom 2024-25 (the Code) which is based upon International Financial Reporting Standards (IFRS), as amended for the public sector. The accounts have been prepared on a going concern basis.

In carrying out its assessment that this basis is appropriate, made prior to the accounts being made available for public inspection on 31 May 2025, management have considered additional qualitative and quantitative requirements.

The basis for preparation is supported by legislation for local authorities and the Code requirements on the basis of continuing services.

The net dealings with members is a net withdrawal from the Fund, hence the investment strategy is designed to subsidise the shortfall in income from participating employers by generating sufficient investment income.

In line with Regulation 62 of the Local Government Pension Scheme Regulations 2013, the Fund's actuary assesses the financial position of the Fund each year and as at 31 March 2025 it has remained in a net surplus position since the last triennial valuation and was 131% funded as at 31 March 2025, with assets of £8.08 billion and liabilities of £6.15 billion. The strategic asset allocation of the Fund to cash is 1.5% and 50% to public equities that can be readily converted to cash.

On this basis the Fund management have a reasonable expectation that it will have adequate resources to continue its operational existence throughout the going concern period to 31 March 2027. For this reason alongside the statutory guidance, the Pension Fund accounts continues to adopt the going concern basis in preparing the financial statements. The accounts report on the net assets available to pay pension benefits. They do not take account of obligations to pay pensions and benefits that fall due after the end of the financial year nor do they take into account the actuarial present value of promised retirement benefits. The Code gives administering authorities the option to disclose this information in the net assets statement, in the notes to the accounts or by appending an actuarial report prepared for this purpose. The Fund has opted to disclose this information in Note 25.

3. Summary of significant accounting policies

Fund account – revenue recognition

Contributions

Normal contributions are accounted for on an accruals basis as follows:

- Employee contribution rates are set in accordance with LGPS regulations, using common percentage rates for all schemes that rise according to pensionable pay.
- Employer contributions are set at the percentage rate recommended by the Fund actuary for the period to which they relate.

6. Notes to the Fund Account continued

Employer deficit funding contributions are accounted for on the basis advised by the Fund actuary in the rates and adjustment certificate issued to the relevant employing body.

Employers' augmentation contributions in respect of ill-health and early retirements are accounted for in the year the event arose. Any amount due in the year but unpaid will be classed as a current financial asset. Amounts not due until future years are classed as long-term financial assets.

Transfers to and from other schemes

Transfers in and out relate to members who have either joined or left the Fund.

Individual transfers in/out are accounted for when received or paid. Transfers in from members wishing to use the proceeds of their additional voluntary contributions to purchase scheme benefits are accounted for on a receipts basis and are included in transfers in (Note 8).

Bulk (group) transfers are accounted for in accordance with the terms of the transfer agreement.

Investment income

Interest income is recognised in the Fund account as it accrues, using the effective interest rate of the financial instrument as at the date of acquisition or origination.

Dividend income is recognised on the date the shares are quoted ex-dividend. Any amount not received by the end of the reporting period is disclosed in the net assets statement as a current asset.

Distributions from pooled funds are recognised at the date of issue. Any amount not received by the end of the reporting period is disclosed in the net assets statement as a current asset.

Rental income from pooled real estate is recognised on a straight-line basis over the term of the lease, and any lease incentives granted are also pro-rated over the lease term. Contingent rents based on the future amount of a factor that changes other than with the passage of time, such as turnover rents, are only recognised when contractually due.

Changes in the value of investments are recognised as income and comprise all realised and unrealised profits and losses during the year.

Fund account – expense items

Benefits payable

Pensions and lump sum benefits payable include all amounts known to be due as at the end of the financial year.

Any amounts due but unpaid are disclosed in the net assets statement as current liabilities, providing that payment has been approved.

Management expenses

The Fund discloses its management expenses in line with the CIPFA guidance Accounting for Local Government Pension Scheme Management Expenses (2016), as shown below. All items of expenditure are charged to the Fund on an accruals basis as follows:

- Administration expenses.
- Oversight and governance expenses.
- Investment management fees.

Administration expenses consist of the following:

- Expenses related to LGPS members and pensioners. These include all activities the pension scheme must perform to administer entitlements and provide members with scheme and benefit entitlement information. Examples of this include pension allocations, benefit estimates, payment of benefits, processing of the transfer of assets, commutation, communications with members and pensioners, and annual benefit statements.
- Expenses related to interaction with scheme employers e.g. data collection and verification, contributions collection and reconciliation, the employer's help desk or other employer support, and communications with employers.
- Associated project expenses.

6. Notes to the Fund Account continued

Oversight and governance expenses are contained in the Operational accounts and are recharged to the Pension Fund.

- Investment advisory services (strategic allocation, manager monitoring etc.).
- Independent advisors to the Pension Fund.
- Operation and support of the Board (i.e. those charged with governance of the Pension Fund), local pensions board, or any other oversight body.
- Costs of compliance with statutory or non-statutory internal or external reporting (annual reports and accounts, etc.).

Investment management fees consist of the following:

- Investment management expenses incurred in relation to the management of Pension Fund assets and financial instruments;
- In accordance with the CIPFA guide, Local Government Pension Management Expenses 2016, this includes expenses directly invoiced by investment managers and any fees payable to fund managers which are deducted from Fund assets; and
- Transaction fees for all categories of investment are included within investment management expenses.

Local Pensions Partnership Investments Limited is responsible for managing all investment managers. Fees of the investment managers and custodian are agreed in the respective mandates governing their appointments. Broadly these are based on the market value of the investments under management and there is also a fee payable based on a percentage of out-performance against an agreed benchmark, for some managers.

Taxation

The Fund is a registered public service scheme under Section 1(1) of Schedule 36 of the Finance Act 2004 and as such is exempt from UK income tax on interest received and from capital gains tax on the proceeds of investments sold. Income from overseas investments suffers withholding tax in the country of origin, unless exemption is permitted. Irrecoverable tax is accounted for as a Fund expense as it arises.

Financial assets

All investment assets are included in the financial statements on a fair value basis as at the reporting date. A financial asset is recognised in the net assets statement on the date the Fund becomes party to the contractual acquisition of the asset. Any amounts due or payable in respect of trades entered into but not yet complete at 31 March each year are accounted for as financial instruments held at amortised cost and reflected in the reconciliation of movements in investments and derivatives in Note 14a. Any gains or losses on investment sales arising from changes in the fair value of the asset are recognised in the Fund account.

The values of investments as shown in the net assets statement have been determined at fair value in accordance with the requirements of the Code and IFRS 13 (see Note 16). For the purposes of disclosing levels of fair value hierarchy, the Fund has adopted the classification guidelines recommended in Practical Guidance on Investment Disclosures (PRAG/ Investment Association, 2016).

Financial assets classed as amortised cost are carried in the net asset statement at the value of outstanding principal receivable at the year-end date plus accrued interest.

Foreign currencies

Dividends, interest and purchases and sales of investments in foreign currencies have been accounted for at the spot market rates at the date of transaction. End-of-year spot market exchange rates are used to value cash balances held in foreign currency bank accounts, overseas investments and purchases and sales outstanding at the end of the reporting period.

Derivatives

The Fund uses derivative financial instruments to manage its exposure to specific risks arising from its investment activities. The Fund does not hold derivatives for speculative purposes.

6. Notes to the Fund Account continued

Cash and cash equivalents

Cash comprises cash in hand and demand deposits and includes amounts held by the Fund's external managers. All cash balances are short-term, highly liquid investments that are readily convertible to known amounts of cash and are subject to minimal risk of changes in value.

Financial liabilities

A financial liability is recognised in the net asset statement on the date the Fund becomes legally responsible for that liability. The Fund recognises financial liabilities relating to investment trading at fair value and any gains or losses arising from changes in the fair value of the liability between contract date, the year-end date and the eventual settlement date are recognised in the Fund account as part of the change in value of investments.

Other financial liabilities classed as amortised cost are carried in the net asset statement at the value of the outstanding principal at 31 March each year. Any interest due not yet paid is accounted for on an accruals basis and included in administration costs.

Actuarial present value of promised retirement benefits

The actuarial present value of promised retirement benefits is assessed on a triennial basis by the scheme actuary in accordance with the requirements of IAS 19 and relevant actuarial standards. As permitted under the Code, the Fund has opted to disclose the actuarial present value of promised retirement benefits by way of a note to the net assets statement (Note 25).

Real Estate fund

The properties within the LPPI Real Estate fund are included at the open market value as at the year-end. The properties were valued at open market value at 31 March 2025 by an independent valuer, Avison Young.

The Properties have been valued individually based on Fair Value, in accordance with the RICS Global Valuation Standards 2017. VPGA 1 - Valuations for inclusion in financial statements, adopts the definition of Fair Value adopted by the International Accounting Standards Board (IASB) in IFRS 13.

This is an internationally recognised basis and is defined as: "The price that would be received to sell an asset, or paid to transfer a liability, in an orderly transaction between market participants at the measurement date."

Avison Young regards Fair Value as Identical to Market Value, defined within the Global Valuation Standards as:

The estimated amount for which a property should exchange on the date of valuation between a willing buyer and willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion.

Additional voluntary contributions (AVCs)

The Fund provides an additional voluntary contribution (AVC) scheme for its members, the assets of which are invested separately from those of the Pension Fund. AVCs are not included in the accounts within the net assets of the scheme in accordance with Section 4(1)(b) of the Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016 but the current value of the AVC is disclosed for information in Note 20.

Contingent assets and contingent liabilities

A contingent asset arises where an event has taken place giving rise to a possible asset whose existence will only be confirmed or otherwise by future events. A contingent liability arises where an event prior to the year-end has created a possible financial obligation whose existence will only be confirmed or otherwise by future events. Contingent liabilities can also arise when it is not possible at the Balance Sheet date to measure the value of the financial obligation reliably.

Contingent assets and liabilities are not recognised in the net asset statement but are disclosed by way of narrative in the notes.

6. Notes to the Fund Account continued

Accounting standards issued, but not yet adopted

Paragraph 3.3.2.13 of the Code requires changes in accounting policy to be applied retrospectively unless alternative transitional arrangements are specified in the Code. Paragraph 3.3.4.3 requires an authority to disclose information relating to the impact of an accounting change that will be required by a new standard that has been issued but not yet adopted by the Code for the relevant financial year.

Paragraph 3.3.4.3 and Appendix C of the Code adapt IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors on an annual basis to limit the impact of standards that have been issued but not yet adopted to those listed in Appendix C of the Code in the relevant year of account (in this case the 2025-26 Code). This means that only the standards listed in paragraph 29 below are included in the requirements for IAS 8 for standards that have been issued and not yet adopted.

The standards introduced by the 2025-26 Code where disclosures are required in the 2024-25 financial statements, in accordance with the requirements of paragraph 3.3.4.3 of the Code, are:

- IAS 21 The Effects of Changes in Foreign Exchange Rate (Lack of Exchangeability) issued in August 2023. The amendments to IAS 21 clarify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking, as well as require the disclosure of information that enables users of financial statements to understand the impact of a currency not being exchangeable.
- IFRS 17 Insurance Contracts issued in May 2017. IFRS 17 replaces IFRS 4 and sets out principles for recognition, measurement, presentation and disclosure of insurance contracts.
- The changes to the measurement of non-investment assets within the 2025-26 Code include adaptations and interpretations of IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets. These include setting out three revaluation processes for operational property, plant and equipment, requiring indexation for tangible non-investment assets and a requirement to value intangible assets using the historical cost approach. These have the same effect as requiring a change in accounting policy due to an amendment to standards, which would normally be disclosed under IAS 8. However, the adaptations also include a relief from the requirements of IAS 8 following a change in accounting policy as confirmed in paragraph 3.3.1.4.

These standards will either have no impact or no material impact on the Fund accounts.

4. Critical accounting judgements

There are no critical judgements that have a material impact on the accounts.

5. Assumptions made about the future and other major sources of estimation uncertainty Unquoted private equity, infrastructure investments and credit funds

Private equities, infrastructure and credit investments are valued at fair value in accordance with International Private Equity and Venture Capital Guidelines (December 2018). See note 5 for further information on the estimations required as part of the valuation method.

Real Estate Fund

The Real Estate property values within the real estate fund are generally a matter of a valuer's opinion rather than fact and may go down as well as up. There is also a risk that the price at which a property is valued may not be realisable in the event of a sale. This could be due to a misestimation of the asset's value or due to a lack of liquidity in the relevant market. Note 5 contains further details on the estimations required as part of the valuation method. Real estate assets were valued at £728.3 million at 31 March 2025 (31 March 2024: £724.9 million), note 14.

6. Notes to the Fund Account continued

Pension Fund liability

The Pension Fund liability is calculated every three years by the appointed Actuary, with annual updates in the intervening years. The methodology used is in line with accepted guidelines and in accordance with IAS 26. Assumptions underpinning the valuations are agreed with the Actuary and are summarised in the Actuarial Statement on page 40 of this report.

This estimate is subject to significant variances based on changes to the underlying assumptions.

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts. Estimates and assumptions take account of historical experience, current trends and future expectations, however actual outcomes could be different from the assumptions and estimates made. The items in the financial statements for which there is a significant risk of material adjustment the following year are as follows:

Item	Uncertainties	Effect if actual results differ from assumptions
Actuarial present value of promised benefits	Estimation of the net liability to pay pensions depends on a number of complex estimates relating to the discount rate used, salary increases, changes in retirement ages, mortality rate, and returns on Fund assets. A firm of consulting actuaries is engaged to provide the Fund with expert advice based on their judgement about the appropriate assumptions to be applied.	For Instance: a) a 0.1% increase in the discount rate would reduce the present value of the total obligation by £84 million. b) a 0.1% increase in long-term salary would increase the present value of the obligations by £4.3 million. c) a 0.1% increase in pension rates that would increase the present value of the obligation by £83 million. More details on the assumptions are shown in note 25.
Long-term credit	Long-term credit investments are valued by calculating the Fund's share of the ret assets in the audited Fund accounts. As these values are not based on observable market data, they have been categorised as fair value Level 3 investments.	Credit is valued at £1.17 billion. There are inherent risks within the valuation technique which means the value could vary between plus and minus 4.0%.
Real Estate	The valuation method for the Real Estate ASC is detailed in note 16. The key valuation uncertainties relate to estimating the rental growth, vacancy levels and the appropriate discount rate. Over the next 12 months, these inputs may change with respect to the changing economic conditions. Refer to note 16, sensitivity of assets, for further explanation.	Real Estate is valued at £728.3 million. There are inherent risks within the valuation technique which means the asset value could vary between plus and minus 6.2%.
Private Equity and Infrastructure	Private equity and Infrastructure investments are valued at fair value in accordance with International Private Equity and Venture Capital Valuation (IPEV) Guidelines (2022). Investments are not publicly listed and as such there is a degree of estimation involved in the valuation of these assets. Uncertainties including changes in market activity, credit risk, expected cash flows, discount rates used can impact valuations. Over the next 12 months, these inputs may change with respect to the changing economic conditions. Refer to note 16, sensitivity of assets, for further explanation.	Private Equity is valued at £466 million and Infrastructure is valued at £931 million. There are inherent risks within the valuation technique which means the asset value could vary between plus and minus 5.1% and plus 4.9% respectively. See note 16 for further information.

6. Notes to the Fund Account continued

6. Post balance sheet events

There are two types of post balance sheet events. There are events after the Net Asset Statement date that provide additional information relating to conditions that existed at the date of the Net Asset Statement (adjusting event) and there are events after the Net Asset Statement date relating to conditions that did not exist at the date of the Net Asset Statement (non-adjusting event).

There were no adjusting or non-adjusting post balance sheet events up to the date of authorisation of the financial statements.

7. Contributions

By category

	2024-25 £'000	2023-24 £'000
Employers – normal	92,648	88,009
Employers – deficit	(666)	1,591
Other contributions	12,655	13,346
Members – normal	52,520	50,015
Augmentation	4,773	3,379
Cessation valuations	109	420
	162,039	156,760

By type of employer

	2024-25 £'000	2023-24 £'000
Scheduled bodies	98,989	91,931
Admitted community	59,291	61,760
Transfer admitted bodies	3,759	3,069
	162,039	156,760

8. Transfers in from other pension funds

	2024-25 £'000	2023-24 £'000
Group transfers	(2,210)	12,671
Individual transfers	25,139	14,345
	22,929	27,016

The group transfer balance is negative because it includes the reversal of £2.4 million of income that was accounted for in 2023-24, but was subsequently received in 2024-25 as individual member transfers.

6. Notes to the Fund Account continued

9. Benefits

By category

	2024-25 £'000	2023-24 £'000
Pensions	287,504	268,837
Commutation and lump sum retirement benefits	37,720	32,518
Lump sum death benefits	6,700	3,983
Tax on exceeding lifetime or annual allowance	458	436
	332,382	305,774

By type of employer

	2024-25 £'000	2023-24 £'000
Scheduled bodies	207,765	191,864
Admitted bodies	13,864	13,246
Community admitted body	108,008	98,010
Transferee admitted body	2,678	2,602
Resolution body	67	52
	332,382	305,774

10. Payments to and on account of leavers

	2024-25 £'000	2023-24 £'000
Refunds to members leaving service	753	621
Group transfers and surpluses on exit payments	10,843	81,209
Individual transfers	25,123	15,259
	36,719	97,089

The group transfers out relate to employers who exited the scheme when their assets in the Fund exceeded their defined benefit liabilities.

11. Management expenses

	2024-25 £'000	2023-24 £'000
Investment management expenses	85,103	98,405
Administration	3,078	2,623
Oversight and governance	4,402	3,921
	92,583	104,949

6. Notes to the Fund Account continued

11a. Investment management expenses

	2024-25 £'000	2023-24 £'000
Management fees	72,927	74,079
LPP management fees directly invoiced	214	149
Performance fees	7,878	12,101
Custody fees	123	92
Transaction fees	3,955	8,117
Other fees	6	3,867
	85,103	98,405

The investment management expenses are grossed up to include fees netted against the investment value, in line with CIPFA's Accounting for Local Government Pension Scheme Management Expenses (2016). This adjustment has an equal impact on management expenses and the change in the market value of investments. There is no impact on the overall net assets of the scheme.

11b. Analysis of investment management expenses

2024-25	Total £'000	Management £'000	Transaction £'000	Performance £'000	Other £'000
Pooled investments – private equity and infrastructure	28,904	25,725	166	3,013	–
Pooled investments – unit trusts and other managed funds	38,929	31,937	2,404	4,459	129
Pooled property income	17,092	15,301	1,385	406	–
Hedge	178	178	–	–	–
	85,103	73,141	3,955	7,878	129

2023-24	Total £'000	Management £'000	Transaction £'000	Performance £'000	Other £'000
Pooled investments – private equity and infrastructure	21,982	18,949	1,165	(1,999)	3,867
Pooled investments – unit trusts and other managed funds	55,427	35,190	5,621	14,524	92

12. Investment income

	2024-25 £'000	2023-24 £'000
Pooled investments – private equity and Infrastructure	161,911	66,652
Pooled investments – unit trusts and other managed funds	50,243	41,428
Pooled property income	29,071	27,507
Interest on cash deposits	14,830	6,763
Other	–	86
	256,055	142,436

13. External audit fee

The audit fee for the Pension Fund is included within the oversight and governance costs charged by LPFA Operations. The fee payable to the auditors of £285,000, was comprised of £182,000 for the 2024-25 audit and £103,000 relating to the audit of previous years (2023-24: £170,000 for the 2023-24 audit and £33,000 for other costs).

Fees are also payable to the external auditors in relation to the certification of the data used to calculate the IAS 19 disclosures for participating employers. The fee is expected to be £60,000 (2023-24: £34,000). These fees are recharged to the employer so the net cost to the LPFA is £nil.

15. Analysis of derivatives

Objectives and policies for holding derivatives

Derivatives are used to hedge liabilities or hedge exposures to reduce risk to the Fund. They are also used to gain exposure to an asset more efficiently than holding the underlying asset. The use of derivatives is managed in line with the Investment Management Agreement between the LPFA and the various Investment Managers.

Futures

There were no directly held outstanding exchange traded futures contracts at 31 March 2025 (31 March 2024: £nil).

Open forward foreign currency contracts

The net position on open forward currency contracts at 31 March 2025 amounts to an asset of £3.6 million (31 March 2024: asset of £.2.0 million). This amount is reflected within the cash balance held by managers.

Analysis of open forward foreign currency contracts

To maintain appropriate diversification a significant proportion of the Funds investments is in overseas assets. To reduce the volatility associated with fluctuating currency rates, the Fund hedges a proportion of overseas investments currency exposure.

16. Fair values – basis of valuation

The LPFA has financial liabilities carried at amortised cost and the carrying amount for instruments that will mature within the next twelve months from the net asset statement date is assumed to equate to the fair value.

The fair values of current financial assets and current financial liabilities at 31 March 2025 have been reviewed and were assessed as being the same as the carrying amounts in the net asset statement. Current financial assets and liabilities are accounted for as financial instruments and held at amortised cost.

The LPFA has not entered into any financial guarantees that are required to be accounted for as financial instruments.

All other investments are held at fair value in accordance with the requirements of the Code and IFRS 13. The valuation basis is set out in a table below. All assets have been valued using fair value techniques based on the characteristics of each instrument, with the overall objective of maximising the use of market-based information. There has been no change in the valuation techniques used this year.

Valuation of financial instruments carried at fair value

The valuation of financial instruments has been classified into three levels, according to the quality and reliability of information used to determine fair values.

Level 1

Financial instruments at level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as Level 1 comprise quoted equities, quoted fixed securities, quoted index linked securities, futures and options.

6. Notes to the Fund Account continued

16. Fair values – basis of valuation continued

Level 2

Financial instruments at Level 2 are those where quoted market prices are not available; for example where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value and where these techniques use inputs that are based significantly on observable data.

Level 3

Financial instruments at Level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data.

Such instruments would include unquoted equity investments which are valued using various valuation techniques that require significant judgement in determining appropriate assumptions.

The values of the investment in private equity and infrastructure are based on valuations provided by the general partners of the funds in which the LPFA has invested.

Basis of valuation	Valuation hierarchy level	Basis of valuation	Observable and unobservable inputs	Key sensitivities affecting valuations provided
Pooled Global Equities	1	Unadjusted quoted bid market prices.	Not required.	Not required.
Cash and cash equivalents	1	Carrying value is deemed to be fair value because of the short-term nature of these financial instruments.	Not required.	Not required.
Amount receivable for sale of investments	1	Carrying value is deemed to be fair value because of the short-term nature of these financial instruments.	Not required.	Not required.
Fixed Income Funds	2	Unadjusted market values based on current yields.	Not required.	Not required.
Forward foreign exchange derivatives	2	Market forward exchange rates at year-end.	Exchange rate.	Not required.
Pooled Diversifying Strategies	2	Independently audited net asset value	Discount rates, cash flow projections.	Not required.
Long-term credit	3	Annually at fair value in accordance with international Private Equity and Venture Capital Valuation Guidelines 2018 or equivalent.	Discount rates, cash flow projections.	Valuations can be affected by changes to cashflows and discount rates.
Pooled Real Estate Investments	3	The Real Estate ASC is valued in accordance with RICS Red Book valuation methodology. The valuations are used to calculate the unit price.	NAV-based pricing set on a forward pricing basis.	Significant changes in rental growth, vacancy levels or the discount rate could affect valuations as could more general changes to market prices.
Private Equity, Infrastructure investments and Non-pooled Diversifying Strategies	3	Annually at fair value in accordance with international Private Equity and Venture Capital Valuation Guidelines 2022 or equivalent.	Discount rates, cash flow projections.	Material events occurring between the date of the financial statements provided and the pension funds own reporting date, changes to expected cash flows; differences between audited and unaudited accounts.

16a. Fair value hierarchy

	Quoted market prices	Using observable inputs	With significant unobservable inputs	Total
	Level 1 £'000	Level 2 £'000	Level 3 £'000	£'000
Market value at 31 March 2025				
Financial assets at fair value through profit or loss	4,449,292	311,044	3,299,406	8,059,742
Financial liabilities at fair value through profit or loss	–	(2,241)	–	(2,241)
Net financial assets	4,449,292	308,803	3,299,406	8,057,501

	Quoted market prices	Using observable inputs	With significant unobservable inputs	Total
	Level 1 £'000	Level 2 £'000	Level 3 £'000	£'000
Market value 31 March 2024				
Financial assets at fair value through profit or loss	4,422,295	421,771	3,236,946	8,081,012
Financial liabilities at fair value through profit or loss	–	(5,444)	–	(5,444)
Net financial assets	4,422,295	416,327	3,236,946	8,075,568

Reconciliation of Level 3 assets

	Market value at 31 March 2024	Purchases during the year	Sales during the year	Realised gains/(losses)	Unrealised gains/(losses)	Market value at 31 March 2025
Private Equity	598,857	30,597	(46,441)	–	(116,891)	466,122
Infrastructure	930,549	48,237	(52,847)	16	4,583	930,538
Long-term credit	978,791	99,425	–	–	94,971	1,173,187
Diversifying Strategies	3,875	(918)	(2,866)	(340)	1,469	1,220
Real Estate	724,873	14,284	–	–	(10,818)	728,339
Total	3,236,946	191,625	(102,154)	(324)	(26,686)	3,299,406

In measuring the Level 3 investments it is possible that one or more of the inputs could be changed, by the valuing manager, to acceptable alternative assumptions. For example different earnings multiples could be used for a comparable company or industry sector. These assumptions may significantly change the valuation of the investment being valued. However, each investment is valued in isolation and changing assumptions for one investment may not be applicable to others. Therefore, carrying out a sensitivity analysis on the whole class may be inappropriate. The LPFA has a large portfolio of Level 3 investments and changes to the value of any one investment are not likely to have a significant impact on the value of the whole class of investments or to the value of LPFA's total asset portfolio.

6. Notes to the Fund Account continued

17. Classification of financial instruments

Financial instruments held by the Fund at the year-end are categorised as follows:

Category

	Market value at 31 March 2025 £'000	Market value at 31 March 2024 £'000
Financial assets – fair value through profit and loss		
Pooled investments:		
– Fixed Income	305,249	191,942
– Equities	4,287,127	4,290,920
– Credit	1,173,187	978,791
– Private Equity	453,622	586,357
– Infrastructure	930,469	930,437
– Real Estate	728,339	724,873
– Diversifying Strategies	–	222,351
	7,877,993	7,925,671
Non-pooled investments		
Equities	11	11
Private Equity	12,500	12,500
Infrastructure	69	112
Diversifying Strategies	1,220	3,875
Managed Funds	–	–
Forward exchange contracts	5,795	7,479
Total financial assets at fair value through profit and loss	7,897,588	7,949,649
Assets at amortised cost		
Cash managed by LPPI	148,901	111,081
Cash at investment managers	7,815	2,378
Investment income due	5,438	6,692
Amounts receivable for sales	–	11,213
Cash balances	35,798	12,029
Current assets – Note 21	3,494	8,181
Total financial assets at amortised cost	201,446	151,574
Finance liabilities – fair value through profit and loss		
Forward exchange contracts	(2,241)	(5,444)
Finance liabilities – at amortised cost		
Current liabilities – Note 22	(6,084)	(414)
Total liabilities	(8,325)	(5,858)
Grand total	8,090,709	8,095,364

The difference between the total financial instruments and the net asset statement relates to assets and liabilities that are not financial instruments, being the VAT receivable, the contributions due, the benefits payable, cessation amounts and the other taxes payable.

6. Notes to the Fund Account continued

Note 17a. Net gains and losses on financial instruments

	2024-25 £'000	2023-24 £'000
Financial assets		
Gains on financial instruments	203,187	676,368
Financial liabilities		
Losses on financial instruments	(135,582)	(122,529)
Total financial assets at fair value through profit and loss	67,605	553,839

18. Nature and extent of risks arising from financial instruments

Risk and risk management

The Fund's primary long-term risk is that its assets may fall short of its liabilities (i.e. promised benefits payable to members). The aim of investment risk management is to minimise the risk of an overall reduction in the value of the Fund and to maximise the opportunity for gains across the whole fund portfolio. The Fund achieves this through asset diversification to reduce exposure to market risk (price risk, currency risk and interest rate risk) and credit risk to an acceptable level. In addition, the Fund manages its liquidity risk to ensure there is sufficient liquidity to meet the Fund's forecast cash flows. The Fund manages these investment risks as part of its overall Pension Fund risk management programme.

Responsibility for the Fund's risk management strategy rests with the Pension Fund Board. Risk management policies are established to identify and analyse the risks faced by the Pension Fund's operations, then reviewed regularly to reflect changes in activity and market conditions.

Market risk

Market risk is the risk of loss from fluctuations in market prices which includes interest and foreign exchange rates, credit spreads, equity prices and volatility. The Fund is exposed to market risk from its investment and hedging activities, with the level of risk exposure depending on asset mix, market conditions, expectations of future price and yield movements. Most of the market risk arises from financial instruments held in investments in LPP pooled funds.

Market risk is managed in line with the risk management objectives within the Fund's Investment Strategy Statement (ISS) and Funding Strategy Statement (FSS), which is to identify, manage and control market risk exposure within acceptable parameters, whilst optimising return on risk. The Fund manages its market risk by establishing a well-diversified asset allocation across different asset classes, countries and currencies. The Fund also seeks to include assets which provide real-term returns as well as cash flow generating assets that try to match the Fund's liabilities.

Market risk – sensitivity analysis

Several approaches are used to measure and monitor the market risk of the Fund including sensitivity analysis, expected volatility, value at risk (VaR) and stress testing. The methodology used may be based on historical data or using simulation techniques, depending on the measure and the type of risk.

The expected volatility over a 1-year time horizon is used as one risk measure for the Fund and is measured as a one standard deviation movement in the total return for the asset classes in which the Fund is invested. The expected volatility provides a measure of the potential largest change in the value of the Fund in around 2/3rds of the time. The total fund volatility reflects the expected interactions between the different asset classes, based on underlying volatilities and correlations of the assets. LPPI uses economic scenario generation (ESG) to model future returns. Ortec Finance's (Ortec) ALM software (GLASS) is used to generate 2,000 future economic scenarios and analyse future investment returns stochastically. Assumptions around future economic conditions and asset class risk and return are primarily Ortec's, however LPPI specifies the weights of Ortec's sub-asset class building blocks for each asset class to best reflect the asset classes which LPPI manages.

The approach makes assumptions on the potential distribution of prices and the potential movement and correlation in equity prices, interest and foreign exchange rates and credit spreads. The limitations of the approach are that the expected asset volatility and correlations may be different over the 1-year time horizon, the assumed distribution of prices may be different and it does not provide a measure of potential outcomes outside the one standard deviation movement.

6. Notes to the Fund Account continued

18. Nature and extent of risks arising from financial instruments continued

Asset class	2025 1 year expected volatility (%)	2025 % of Fund	2024 1 year expected volatility (%)	2024 % of Fund
Global Equities	20.9	53.1	16.4	53.5
Private Equity	27.5	5.7	25.2	7.0
Real Estate	15.8	9.1	13.2	9.1
Fixed Income	4.5	3.8	3.6	2.4
Infrastructure	16.5	11.5	15.6	11.5
Credit	7.9	14.5	8.1	11.9
Diversifying Strategies	8.6	0.0	5.4	2.9
Cash	0.0	2.3	0.0	1.6
Total Fund	15.0	100.0	11.9	100.0

The value of the Fund as at 31 March 2025 was £8,077 million (2024: £8,031 million) and the expected volatility was 15.0% (2024: 11.9%). Given these figures, we would expect that in roughly 2/3rds of outcomes the value of the Fund would lie between £9,288 million (2024: £8,986 million) and £6,865 million (2024: £7,075 million) in 12 months' time, expressed in today's equivalent present value.

Interest rate risk

The Fund invests in financial assets for the primary purpose of obtaining a return on investments. These investments are subject to interest rate risks, which represent the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The main interest rate risk for the Fund is within the fixed income assets.

The Fund is also exposed to interest risks within its pension liabilities.

The sensitivity of financial instruments in the Fund to interest rate movements is captured in the sensitivity analysis within the market risk section.

Currency risk

Currency risk represents the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Fund is exposed to currency risk through non-sterling investments, where the currency risk has not been hedged, while it holds sterling liabilities. The currency risk is mainly in the global equity, private equity, credit and infrastructure pooled portfolios.

The Board has established a currency hedge programme to dampen the effect of foreign currency fluctuations on the value of the non-sterling investment asset. The hedge currently covers 50% of the non-sterling exposure of the global equity portfolio, excluding emerging markets, and 100% of the total return portfolio. The currency hedge programme is reviewed regularly as part of LPFA's investment strategy review.

Currency risk sensitivity analysis

The increase in currency exposure over the year reflects the inclusion of currency risk from investments in private equity, infrastructure and credit in the table below.

6. Notes to the Fund Account continued

18. Nature and extent of risks arising from financial instruments continued

The expected standard deviation of the Fund's significant currency exposure is based on 12-month market implied volatilities taken from Bloomberg as at 31 March 2025. The following table summarises the Fund's approximate currency exposure and expected 12-month volatility by currency as at 31 March 2025 and as at the previous period end:

Value at 31 March 2025 £m	Implied volatility %	Currency	Value at 31 March 2024 £m	Implied volatility %
3,354	7.7	USD	3,416	7.2
149	10.6	JPY	241	9.4
735	5.4	EUR	924	5.1
57	7.1	CAD	60	6.4
137	6.9	CHF	141	6.1

The sensitivity of the Fund to currency movements is captured in the sensitivity analysis within the market risk section.

Credit risk

Credit risk is the risk that the issuer or counterparty to a transaction or a financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss. The main credit risk within the Fund arises predominantly from investments in fixed income securities within the pooled funds, where the issuer may default or is unable to pay its obligation when due. The Fund seeks to minimise its credit risk by the selection of high quality counterparties, brokers and financial institutions.

Credit risk also arises with LPFA deposits held with banks and financial institution. The majority of the cash balance is held by the fund manager in the LPFA LPPI cash account. This cash is placed in money market funds in accordance with the recommendation of the fund manager.

The sensitivity of the Fund to credit spreads is captured in the sensitivity analysis within the market risk section.

The LPFA believes it has managed its exposure to credit risk, and has had no experience of default and uncollectable deposits over the past five financial years. The Fund's cash holding under its treasury management arrangements at 31 March 2025 was £148.9 million (2024: £111.0.million).

Liquidity risk

Liquidity risk is the risk that the LPFA has insufficient funds to meet its financial obligation when due. These obligations may arise from operating expenses, payment to members or to meet investment commitments.

The LPFA manages its liquidity risk by forecasting future cash requirements and having immediate access to enough funds, either through cash holdings or holding highly liquid assets that can be readily liquidated if required. The LPFA has immediate access to its cash holdings with the LPFA LPPI cash account held by the custodian Bank of New York Mellon (BNYM) and Lloyds Bank Plc.

The LPFA defines liquid assets as assets that can be converted to cash within three months. Illiquid assets are those assets which will take longer than three months to convert in to cash. As at 31 March 2025, the value of illiquid assets (Private Equity, Infrastructure, Real Estate, Credit and non-pooled Diversifying Strategy) was £3,299 million, which represented 40.85% of the total LPFA assets (31 March 2024 restated: £3,236 million which represented 40.31% of the total LPFA assets).

All financial liabilities at 31 March 2025 are due within one year.

23. Related party transactions

This disclosure note has been produced using a specific declaration obtained in respect of related party transactions. The LPFA has prepared this note in accordance with its interpretation and understanding of IAS 24 and its applicability to the public sector using current advice and guidance.

Some of the Board members have positions of authority within organisations that are participating employers of the scheme. The employer contributions paid into the scheme by these employers have been disclosed as related party transactions. The Board members receive no financial benefit from these payments.

Ruth Dombey is one of the three Vice Chair of London Councils. London Councils paid employer contributions of £0.7 million (2024: £0.7 million) and it is noted that she has no pecuniary interest in financial matters. The London Councils are an Admitted body in the Fund

Board members, via their employment with the LPFA, are not enrolled in the Pension Fund.

The Office of the Mayor of London is issued with a draft of the LPFA Medium Term Financial Plan by the end of December and has the opportunity to provide feedback. As the Office of the Mayor of London is part of the Greater London Authority and it is a participating employer, the employer contributions are deemed to be related party transactions. The Greater London Authority paid employer contributions of £7.8 million (2024: £7.2 million) during the year.

LPFA Operational, being the administering authority, is deemed to be a related party and the transactions with the Fund are reflected in its accounts. The LPFA Operational Accounts include costs recharged to the Pension Fund totaling £7.4 million (2024: £6.5 million).

The LPFA entered into a joint venture with Lancashire County Council and incorporated Local Pensions Partnership Ltd (LPP) and its subsidiaries Local Pensions Partnership Investments Ltd (LPPI) and Local Pensions Partnership Administration Ltd (LPPA) on 8 April 2016. LPP is a related party of the LPFA. In addition, in 2020 the LPFA acquired a £12.5 million direct investment in LPP, being £12.5 million non-voting £1 ordinary shares. This is included as private equity within investment assets. LPPI invoiced the scheme £9.1 million (2024: £9 million) for investment fees and the administration service costing £3.1 million (2024: £2.6 million) was provided by LPPA.

The LPFA relies on LPPI's AAF 01/20 assurance process, to provide confidence regarding the information provided by LPPI investment management. Also BNYM is involved as Custodian in reviewing the net asset values that LPPI issue to LPFA and we have a copy of BNYM internal controls report. For the SPV accounts these are subject to external audit annually which provides assurance over the numbers at year end.

The membership data and other service provided by LPPA pension administration services, are subject to periodic internal audit from LPPA and LPFA's internal auditors. Also there is a reliance on the Actuaries Barnett Waddingham who liaise with LPPA in providing pension data that the LPFA uses for collection of contributions and benefit payments.

The year-end joint venture adjustment for 50% of the LPP Group is based on independently audited LPP Group accounts.

6. Notes to the Fund Account continued

24. Contractual commitments

Outstanding capital commitments (investments) at 31 March 2025 totalled £327.2 million (2024: £245.2 million) based on:

Currency	Commitment currency value	Exchange rate	31 March 2025 £'000
US\$	162,215,492	1.291	125,675
CHF	7,029,000	0.876	8,027
EUR	92,495,495	1.195	77,407
GBP	116,068,690	1.000	116,069
Total			327,178

These commitments relate to outstanding call payments due on unquoted Limited Partnership funds held in the Private Equity and Infrastructure parts of the portfolio.

The amounts "called" by these funds are both irregular in size and timing over a period of between 4 and 6 years from the date of each original commitment.

25. Actuarial present value of promised retirement benefits

In addition to the triennial valuation, the Fund's Actuary also undertakes a valuation of the Pension Fund liabilities in accordance with IAS 26, every year using the results of the latest Triennial Actuarial Valuation, which for this report was at 31 March 2022, estimated income and expenditure for the year, Fund returns for the year and details of any new retirements for the year that have been paid out on an unreduced basis, which are not anticipated in the normal employer service cost.

The present value of the defined benefit obligation at 31 March 2025 of the Fund was £6,148.2 million (2024: £6,838.7 million). The net asset for the Fund at 31 March 2025 was £1,932.6 million (2024: asset £1,199.7 million).

Key assumptions used

Life expectancy from age 65 (years)	31 March 2025	31 March 2024
Retiring today		
Males	20.90	20.90
Females	23.70	23.70
Retiring in 20 years		
Males	21.90	21.90
Females	25.10	25.10

- Members will exchange pension to get 50% of the maximum available cash on retirement. For every £1 of pension that members commute, they will receive a cash payment of £12 as set out in the Regulations;
- Members will retire at one retirement age for all tranches of benefit, which will be the pension weighted average tranche retirement age; and
- The proportion of the membership that had taken up the 50:50 option at the previous valuation date will remain the same.

6. Notes to the Fund Account continued

25. Actuarial present value of promised retirement benefits continued

The financial assumptions used for the purposes of the calculations are as follows:

	31 March 2025 % p.a.	31 March 2024 % p.a.
RPI increases	5.70	4.85
Salary increases	2.95	2.90
Pension increases (CPI)	3.30	3.30
Discount rate	3.95	3.90

These assumptions are set with reference to market conditions at 31 March 2025.

	31 March 2025	31 March 2024
Base table	Club Vita tables	Club Vita tables
Multiplier (M/F)	95%-125%	95%-125%
Future improvements model	CMI_2023	CMI_2022
Long-term rate of improvement	1.25% p.a.	1.25% p.a.
Smoothing parameter	7	7
Initial addition parameter	0.0% p.a.	0.0% p.a.
2020 weighted parameter	0%	0%
2021 weighted parameter	0%	0%
2022 weighted parameter	15%	25%
2023 weighted parameter	15%	n/a

Sensitivity analysis	£000	£000	£000
Adjustment to discount rate	+0.1%	0.0%	-0.1%
Present value of total obligation	6,064,342	6,148,195	6,234,048
Adjustment to long-term salary increase	+0.1%	0.0%	-0.1%
Present value of total obligation	6,152,534	6,148,195	6,143,888
Adjustment to pension increases and deferred revaluation	+0.1%	0.0%	-0.1%
Present value of total obligation	6,231,944	6,148,195	6,066,354
Adjustment to mortality age life expectancy assumption rating	+1 Year	None	-1 Year
Present value of total obligation	6,377,009	6,148,195	5,928,751

These assumptions are set with reference to market conditions at 31 March 2025.

26. Key management personnel

The payments to key management personnel are included within the Operational Accounts, being the administering authority. The key management personnel are the Chief Executive, the Finance Director and S151 Officer, the Compliance and Risk Director, the Funding and Investment Director and the Chief of Staff. The details are summarised below:

	2024-25 £'000	2023-24 £'000
Short-term benefits	803	926
Pension	–	97
	803	1,023

7. Actuary's Statement as at 31 March 2025

Introduction

The last full triennial valuation of the London Pensions Fund Authority Pension Fund was carried out as at 31 March 2022 as required under Regulation 62 of the Local Government Pension Scheme Regulations 2013 (the Regulations) and in accordance with the Funding Strategy Statement of the Fund. The results were published in the triennial valuation report dated 22 March 2023.

Asset value and funding level

The results for the Fund at 31 March 2022 were as follows:

- The smoothed value of the Fund's assets for funding purposes as at 31 March 2022 was £7.53 billion.
- The funding level taking into account the individual employer funding targets was 128%. The surplus on this basis was £1.63 billion which is an improvement from the position at 2019. This means the assets were 128% of the value that they would have needed to be to pay for the benefits accrued to that date based on the assumptions used.
- These results take into account the individual employer funding strategies which have been updated since the 2019 valuation.
- The contribution rate for each employer was based on the employer's calculated cost of new benefits, known as the primary rate, plus any adjustment required (for example, to allow for deficit recovery), known as the secondary rate.
- The assumptions used for each employer in setting these contributions varied based on the period that they were expected to continue in the Fund and the assessed strength of their covenant.
- In particular, the discount rate varied by employer as higher allowances for prudence (leading to lower discount rates) were applied for less secure employers.

Contribution rates

The employer contributions rates, in addition to those paid by the members of the Fund, are set to be sufficient to meet:

- the annual accrual of benefits allowing for future pay increases and increases to pensions in payment when these fall due;
- plus an amount to reflect each participating employer's notional share of the Fund's assets compared with 100% of their liabilities in the Fund, in respect of service to the valuation date.

The primary rate of contribution on a whole Fund level was 15.2% of payroll p.a. The primary rate as defined by Regulation 62(5) is the employer's share of the cost of benefits accruing in each of the three years beginning 1 April 2023.

In addition, each employer may pay a secondary contribution as required under Regulation 62(7) that when combined with the primary rate results in the minimum total contributions payable. This secondary rate is based on each employer's particular circumstances. In many cases the secondary rate is negative, which means that a reduction is applied to the employer's primary rate to calculate the minimum total contribution rate.

Details of each employer's contribution rate are contained in the Rates and Adjustments Certificate in Appendix 5 of the triennial valuation report.

7. Actuary's Statement as at 31 March 2025 continued

Assumptions

The key assumptions used to value the liabilities at 31 March 2022 are summarised below:

Assumptions	Assumptions used for 2022 Valuation
Financial assumptions	
Market date	31 March 2022
CPI inflation	2.9% p.a.
Long-term salary increases	3.9% p.a.
Weighted average discount rate (employer specific strategies)	5.2% p.a.
Demographic assumptions	
Post-retirement mortality	
Base tables	Based on Club Vita analysis
Projection model	CMI 2021
Long-term rate of improvement	1.25% p.a.
Smoothing parameter	7.0
Initial addition to improvements	0.0% p.a.
2020-21 weighting parameter	5.0%

Full details of the demographic and other assumptions adopted, as well as details of the derivation of the financial assumptions used, can be found in the 2022 valuation report.

Updated position since the 2022 valuation:

Assets

In the 12 months to 31 March 2025 the investment return on the Fund's assets is estimated to have been 3.1% per annum. This is lower than the previous year's return to 31 March 2024 of 8.0%. The Fund updated their strategic asset allocation from 1 April 2024, however this had little impact on the discount rate calculation, and therefore little impact on the expected return. As at 31 March 2025, in market value terms, the Fund's assets were less than where they were projected to be based on the previous valuation.

Liabilities

The key assumption which has the greatest impact on the valuation of liabilities is the real discount rate (the discount rate relative to CPI inflation) – the higher the real discount rate, the lower the value of liabilities. As at 31 March 2025, the real discount rate calculated using the same methodology as at 31 March 2022 but updated for changes in market conditions is broadly unchanged compared with the 2022 valuation.

The value of liabilities will have increased since the 2022 triennial valuation, due to interest accrued over the period as well as actual inflation being higher than previously anticipated over the last few years

Overall position

On balance, we estimate that the funding position has weakened on the individual employer strategies basis compared to 31 March 2022, using the 2022 valuation methodology.

Were we to carry out a valuation at 31 March 2025 based on the same data and methodology for deriving the assumptions used for the 31 March 2022 valuation, we estimate that the average primary contribution rate across all employers would be broadly unchanged due to the broadly unchanged real discount rate compared to 31 March 2022. The impact of the weakened funding position on secondary contributions would vary by employer.

However, the methodology and assumptions will be updated as part of the next formal valuation, which will be carried out as at 31 March 2025 with new contribution rates set from 1 April 2026. This will take into account changes in market conditions, assumptions and membership data, and will provide the Fund with an updated position.

The Fund can continue to monitor the funding level using LGPS Monitor on a regular basis.

Liam Drysdale FFA

Associate, Barnett Waddingham LLP
