Engagement (Public Markets): Robeco

The dashboard below provides quarterly information on engagement activity undertaken by the Robeco Active Ownership Team, an external provider of engagement services, on behalf of LPPI. The metrics show where activities were focussed by the topics covered (number of individual cases), the form of engagement (by method), the sectors of companies engaged, and the companies location by region. The final metric illustrates the progress made on each engagement theme. Each horizontal bar shows what proportion of engagements have been successful and what proportion are showing positive, flat or negative progress.
